

**BIOECONOMY
FOR CHANGE**

NETWORK & EXPERTISE

CHANGE WITHOUT REINVENTING THE WHEEL

Conscious of the huge challenges ahead, we believe in new ways of producing, eating, getting about, building and taking care of our health. We believe in the latest practices that promote the bioeconomy and fuel its development across every market and sector supported by a circular model.

Because we believe in a much better future, we also believe the bioeconomy is there to support this change...

AND THAT CAN CHANGE EVERYTHING.

|| TRANSFORM THE WEALTH OF
RESOURCES FROM OUR TERRITORIES
INTO SUSTAINABLE SOLUTIONS
FOR FUTURE GENERATIONS. ||

OUR MANIFESTO FILM

WELCOME TO B4C

We are the reference network for the bioeconomy in France, Europe and internationally. Our team of 35 specialists serve more than 500 members, from upstream agricultural activities through to the commercialisation of finished products. France is truly leading the way in the bioeconomy and is looking to extend its expertise globally. Our network promotes the bioeconomy, supports the projects of our members, and fosters networking and dynamic collaboration. Our ambition? To make France a world leader in biomass valorisation.

PROMOTE YOUR ACTIONS

Representation, regulatory analysis and legislation...
all the keys to defend our best practices.

GROW YOUR NETWORK

Events, networking, directories...
all the opportunities to find the right partners.

AN ECOSYSTEM DESIGNED FOR COLLECTIVE ACTION

INFORM YOUR DECISIONS

Strategic advice, market and opportunity studies, intelligence platforms...
all our analysis to guide your decisions.

BRING YOUR INNOVATIONS TO LIFE

Support and expertise...
all our advice to propel and finance your projects.

OVER 500 MEMBERS COMMITTED TO CHANGE

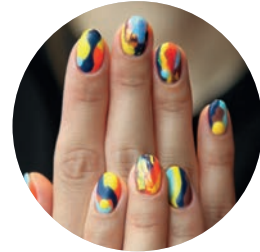

Within our network, we work on every aspect of the production and valorisation of bioresources (agriculture, forests, marine resources, byproducts and waste) for the production of food, industrial processes and energy.

Bioresources

Food and feed

**Bio-based chemistry and
industrial biotechnology**

Bio-based materials

Bioenergies

**Processes and
technologies**
